

NANDAN VIJAYRAO KHAWALE

B.E. - Artificial Intelligence & Data Science

Ph: +91-9322436920

Email: nandankhawale555@gmail.com

Pune, Maharashtra, India - 411018

LinkedIn: <https://www.linkedin.com/in/nandan-khawale>

PROFESSIONAL SUMMARY

Curious and driven B.E. student in Artificial Intelligence and Data Science with a strong interest in real-world AI and data-driven solutions. Skilled in Python, SQL, and with hands-on experience in Data Science, Machine Learning, and Full-Stack Development. Successfully built intelligent systems such as an AI Travel Planner, Drug Identifier, CareerPathAI, and Cognibank — a Generative AI-Based Loan Recommendation and Customer Profiling System that leverages conversational AI and explainable ML models to personalize banking solutions. Passionate about applying AI creatively to solve meaningful problems.

KEY EXPERTISE

C++ Python SQL Data Science

EDUCATION

Dr. D. Y. Patil Institute of Technology

2026

B.E. - Artificial Intelligence & Data Science | CGPA: 9.06 / 10

Matoshree Vimalabai Deshmukh Mahavidyalaya Amravati, Amravati

2022

12th | MSBSHSE | Percentage: 80.83 / 100

Golden Kids English High School, Amravati, Amravati

2020

10th | MSBSHSE | Percentage: 90.20 / 100

PROJECTS

CogniBank-Generative AI Loan Recommendation System and Customer Profiling

20 Aug, 2025 - 10 Sep, 2025

Key Skills: GenAI MongoDB LLM NextJS Machine Learning FastAPI

Project Link: <https://cogni-sand.vercel.app/>

CogniBank is an intelligent loan application and management system that integrates a modern Next.js frontend with a FastAPI backend, providing customers with a seamless and interactive banking experience. The platform leverages AI-powered chatbot assistance and machine learning models to offer real-time loan eligibility checks, personalized interest rates, and instant predictions.

Careerpath AI -AI Powered Career Recommendation System

27 Jun, 2025 - 05 Jul, 2025

Team Size: 1

Key Skills: Streamlit UI Python Neo4j ChromaDB Groq LLM

Project Link: <https://github.com/nandankhawale/CareerPathAI>

Designed and implemented an AI-powered career advisory system leveraging LangChain, Groq LLM, Neo4j, and ChromaDB to deliver personalized career guidance. The system extracts key skills from resumes, maps them onto a Neo4j knowledge graph, and recommends suitable job roles along with the additional skills required to bridge gaps. A Streamlit-based UI provides an interactive interface where users can explore role-specific skill paths, and receive AI-driven guidance for career growth.

Drug Detection

03 Mar, 2025 - 04 Apr, 2025

Team Size: 4

Key Skills: Python, EasyOCR, Transformers, ViT, PyTorch, OCR, Image Processing, Django (Backend), Deep Learning, cnn

Project Link: <https://huggingface.co/spaces/nandanthecoder/drugidentifiermodel/tree/main>

The Drug Detection and Classification System leverages OCR and deep learning models to identify medicines from images. Using EasyOCR for text extraction and Vision Transformers (ViT) for image classification, the system can classify common medicines. The backend is built with Django, providing secure and scalable functionality, while a user-friendly interface enables easy interaction with the system. The project preprocesses input images by enhancing contrast, brightness, and sharpness for improved text recognition. It also includes a brand mapping system to identify medicine based on brand names or abbreviations. The system employs a fine-tuned ViT model for image classification as a fallback when OCR fails to identify the medicine accurately. Through Django, users can upload images, get predictions, and view the results on an intuitive interface.

AI Travel Planner

21 Jan, 2025 - 26 Feb, 2025

Team Size: 4

Key Skills: Artificial Intelligence , Django Framework , API Integration , Web Development , Python Programming

Project Link: <https://github.com/nandankhawale/aitravel-planner>

Developed an AI Travel Planner that uses intelligent algorithms to generate personalized travel itineraries based on user preferences. The system integrates the Hugging Face Space Travel Planning Agent models API for generating optimized travel suggestions, such as destinations, activities, accommodations, and travel routes. The backend, powered by Django, processes user inputs and integrates external travel data sources to offer tailored itineraries. This project simplifies the travel planning process by providing an interactive and optimized experience, taking into account the user's interests, budget, and time constraints

ASSESSMENTS / CERTIFICATIONS

AWS Cloud Practitioner Essential

Provider: AWS

Key Skills: Cloud Computing

The course provides a foundational understanding of Amazon Web Services (AWS) cloud concepts, services, security, architecture, pricing, and support.

Neo4j Certified Professional

Provider: neo4j Graph academy

Key Skills: Neo4j Cypher

Artificial Intelligence Primer Certification

Provider: Infosys SpringBoard

Key Skills: Data Science AI Deep Learning NLP Computer Vision

Principles of Generative AI Certification

Provider: Infosys SpringBoard

Key Skills: genrative ai openai

POSITIONS OF RESPONSIBILITY

Design Head, ByteMinds Society

Led the creative vision and design team at ByteMinds Society, Pune. Developed innovative visual content for workshops, events, and outreach programs. Ensured consistency in branding and supported the society's mission of promoting digital literacy through compelling design solutions.

Design Team Member, DSAIL Club

Contributed to organizing the flagship event, Technovation 2.0, by designing promotional materials and visuals for various activities. Played a key role in enhancing the club's outreach and engagement, fostering technological innovation among students.

Production Team Member, Devkraft Club

Collaborated with the team to organize DevClash, a hackathon event. Managed event logistics a to ensure a seamless experience, encouraging innovation and teamwork among participants.

PERSONAL INTERESTS / HOBBIES

- Designing graphics and UI elements , Listening to music , Traveling and exploring new places
